

Advantage Social Communication Program

The Advantage Social Communication Program is an 11-week series that focuses on young adults ages 14-22. This program is designed to teach communication skills by understanding how to make positive impressions through appearance, actions, and words.

During this 11-week course, each teen/young adult will participate in a weekly class to improve their understanding and use of social communication skills. Parents will take part in their own class to learn strategies for how to more effectively engage, motivate, and support their children in their use of social communication skills across environments and social situations.

Instructed by:

Michelle Wahlquist, MS, CCC-SLP Speech Pathologist, Division Lead
Chelsea O’Haire, Psy.D, Licensed Clinical Psychologist
