

Autism and other Neurodevelopmental Disorders

in African American, Biracial and Multiracial Families!

A Safe Space for Black, Biracial & Multiracial Families to Share, Learn and Focus on important Issues relating to and assisting our Children in thriving at Home and their Community.

SUPPORTING EARLY CHILDHOOD

WHY DOES EVERYONE WANT TO "FIX" MY CHILD?

The Center for Autism & Neurodevelopmental Disorders is offering a presentation for parents and caregivers about *transitioning a child with developmental delays from Early Intervention services to Pre-School* and/or other Regional Center Services. Including: *Qualifying & Admission to Pre-School, The IEP Process, Self Determination, Person Centered Planning, and Advocacy.*

We will highlight the importance of these plans, laws, and documentation to help families learn what their children are entitled to.

Become Empowered!

- * Does entitlement to RCOC services end at Age 3? What comes next?
- *When I am told no, what steps can I take? Making my child's voice heard!
- * How do I Advocate? How do I find additional resources?

Nellie Valentine
Facilitator

Nellie is successfully raising her 4 children, [2 adults and 2 adolescents] with diagnoses of Autism and other co-occurring conditions. She has over 24 years of experience and training.
